WORK HISTORY

August 2022 - current

Senior Front End Engineer

383 Project, Birmingham, United Kingdom

- Lead the delivery of a headless commerce website for Glenmorangie, built with Shogun Frontend CMS and Shopify
- Contributing to a new React Native application for a market-leading brand of manufacturing heating and hot water products
- Contributing to new Microsoft Teams and Slack applications for one of the world's preeminent journals on both the Front End and the Back End
- Define and establish the future frontend tech stack for the company, focusing on CMS solutions
- Contributing to the implementation of a code of conduct for Front End engineers to define Standard Operating Procedures and Best Practices
- Finding solutions working within a legacy code base
- Refactored legacy code, reducing the codebase size while maintaining functionality, resulted in easier maintenance and faster feature development
- Introduced testing and development tools into existing legacy codebase
- Weekly mentoring session to junior engineer
- Worked closely with product owners to understand customer requirements.

January 2022 - July 2022

Front End Engineer

383 Project, Birmingham, United Kingdom

- Developed secure and reliable web-based solutions to meet customer requirements
- Utilized APIs to provide data to web applications.
- Worked closely with the project manager and the backend developer to deliver a set of new features to existing project
- Communicated project status to primary stakeholders and project management personnel.
- Worked closely with back-end developers to troubleshoot and resolve coding issues
- Debugged websites to identify and resolve potential problems
